

BW 2000 Conversion Chart

BW2 is a dedusted extra-strength powder lightener. Mix with 10-, 20-, or 30-volume developer in a plastic bowl to a creamy consistency.

- | | | |
|-----------|---|--|
| 10-volume | — | for slower, less lightening action and for chemically relaxed hair |
| 20-volume | — | for standard lightening |
| 30-volume | — | for fast lightening |

Apply only to areas that have not been decolorized previously.
Process until desired lightness is achieved.

If hair has been relaxed or permed, wait at least one week and one shampoo before applying. Strand test to determine timing.
